quantum mechanics is of major importance to information philosophy, because we depend on a limited indeterminism and an "adequate" or statistical determinism to explain the possibilities in an open future needed to create new information. Di, 04 Dez 2018 16:11:00 GMT Albert Einstein - Information Philosopher - The goal of the Space Studies Colloquium is to bring guest researchers from the astronomical and space science communities in both industry and academia to support space-related scholarship in the Department of Space Studies and at UND and other North Dakota institutions of higher education. Do, 06 Dez 2018 13:24:00 GMT Department of Space Studies - Deep learning algorithms, in particular convolutional networks, have rapidly become a methodology of choice for analyzing medical images. This paper reviews the major deep learning concepts pertinent to medical image analysis and summarizes over 300 contributions to the field, most of which appeared in the last year.
